EDUCATION

2022 - 2027

ECOLE NATIONALE DES SCIENCES
APPLIQUÉES DE FES

- Master's in Embedded Systems and AI

2018 - 2021

ST. PETER'S HIGH SCHOOL

- I studied Science as a field in
The Gambia

2015 - 2018

ST. PETER'S JUNIOR SCHOOL

SKILLS

- RTOS & Embedded Linux
- Arduino, ESP32 & Raspberry pi.
- C, C++, Java and Python
- Web development.
- VHDL
- Computer Vision & ML
- System Programming
- ARM Processor
- Leadership qualities
- Eagerness to learn new skills
- Good time management

BARROW NFANSU O.

Embedded Systems and AI Engineering Student

PROFILE

A dedicated fourth-year Engineering student at ENSAF, specializing in Embedded Systems and Artificial Intelligence. Highly motivated to design and develop innovative embedded solutions that integrate AI with real-time systems. Experienced in working with microcontroller-based applications and eager to apply technical expertise in a professional environment. Actively seeking an internship opportunity to enhance practical skills, gain industry exposure, and contribute to advanced projects in embedded systems and AI. Fluent in English and conversant in French, with a strong commitment to continuous learning and technological advancement.

PROJECTS

- **Build my personal Portfolio in front End Development**
This portfolio has my background and also contains my projects and certificates
- **Intelligent Vehicle Management web Application at CHU**

This is an intership project at CHU where i developped web application for vehicle management at CHU

- **Hand Gesture control of Embedded devices**
This project involves the use of computer vision along with ESP32 to control hardware devices with the use of hand gesture.
- **Vehicle Tracking Project**

This project involves the application of computer vision that helps to detect and count the number of vehicles passing on the road.

- **Web base remote control devices using ESP32**

This project allows me to control devices via WIFI that gives me access to fully control devices remotely using the internet protocol

- **Embedded Linux development with Buildroot**

This project involves developping a customize linux image using the buildroot tool for raspberry pi4 board which has only the necessary tools.

CERTIFICATES

- Responsive Web Design Certification
- Science & Math's Club Member
- Matlab Basic Certification
- Intro to machine Learning
- Intro to deep learning
- Computer Vision Certification

LANGUAGES

- English (Fluent)
- French (Fluent)
- Arabic (Basics)

EXPERIENCES

- Treasurer of GASAM association in 2024/2025.
- Was a member of Math's & Science Club in High School
